Attached please find our PHASE I ENVIRONMENTAL SITE ASSESSMENT, ("the Report") for the above-mentioned Subject Property. This report has been prepared by Odic for the Client under the professional supervision of the principal and/or senior staff . Neither Odic, nor any staff member assigned to this investigation has any interest or contemplated interest, financial or otherwise, in the subject or surrounding properties, or in any entity which owns, leases, or occupies the subject or surrounding properties, and has no personal bias with respect to the parties involved.

The assessment was conducted in a manner consistent with the level of care and skill ordinarily exercised by members of the profession, and in accordance with generally accepted practices of other consultants currently practicing in the same locality under similar conditions. No other representation, expressed or implied, and no warranty or guarantee is included or intended. The Report speaks only as of its date, in the absence of a specific written update of the Report, signed and delivered by Odic.

There are no intended or unintended third party beneficiaries to this Report, unless specifically named. Odic is an independent contractor, not an employee of either the issuer or the borrower, and its compensation was not based on the findings or recommendations made in the Report or on the closing of any business transaction. Thank you for the opportunity to prepare this Report, and assist you with this project. Please call us if you have any questions or if we may be of further assistance.

By signing below, Odic declares that, to the best of our professional knowledge and belief, the undersigned meet the definition of an Environmental Professional as defined in §312.10 of 40 CFR 312 and have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. Odic has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Respectfully Submitted,

Mike Miller

Senior Consultant per §312.10 of 40 CFR 312

CERTIFICATE OF LIABILITY INSURANCE

DATE (MM/DD/YYYY): 3/25/2026

THIS CERTIFICATE IS ISSUED AS A MATTER OF INFORMATION ONLY AND CONFERS NO RIGHTS UPON THE CERTIFICATE HOLDER. THIS CERTIFICATE DOES NOT AFFIRMATIVELY OR NEGATIVELY AMEND, EXTEND OR ALTER THE COVERAGE AFFORDED BY THE POLICIES BELOW. THIS CERTIFICATE OF INSURANCE DOES NOT CONSTITUTE A CONTRACT BETWEEN THE ISSUING INSURER(S), AUTHORIZED REPRESENTATIVE OR PRODUCER, AND THE CERTIFICATE HOLDER.

IMPORTANT: If the certificate holder is an ADDITIONAL INSURED, the policy(ies) must have ADDITIONAL INSURED provisions or be endorsed. If SUBROGATION IS WAIVED, subject to the terms and conditions of the policy, certain policies may require an endorsement. A statement on this certificate does not confer rights to the certificate holder in lieu of such endorsement(s).

EXECUTIVE SUMMARY

ODIC Environmental (hereinafter referred to as ODIC) performed a *Phase I Environmental Site Assessment* (hereinafter *Phase I ESA* or *Report*) of the *subject property* (hereinafter referred to as the Property) in conformance with the scope and limitations of ASTM Standard Practice E1527-21. Any exceptions to or deletions from this practice are described in the individual sections of this Report. A summary of findings is provided below:

SUMMARY OF FINDINGS
CURRENT PROPERTY ADDRESS(ES)
The Property addresses are 1608 and 1624 Philadelphia Street, Ontario, San Bernardino County, CA 91761.
PROPERTY DESCRIPTION
The Property consists of two adjoining undeveloped parcels that total 2.44 acres.
SUMMARY OF PROPERTY RECONNAISSANCE
The Property is undeveloped land. No environmental concerns were observed during the Property reconnaissance.
HISTORICAL USE OF THE PROPERTY
The Property was agricultural land in a 1938 aerial photograph. By 1946, a dwelling was present on the southeast portion. By 1953 the Property was vacant land, no longer agricultural. By 1959 the Property was developed with two dwellings and outbuildings on the south portion. In 1991 the dwellings were demolished and the Property has been vacant since then.
HISTORICAL USE OF ADJOINING PROPERTIES / VICINITY Note: Section 8.3.9 of ASTM Standard Practice E1527-21 states: *During research of the subject property, as described in Section 8.3.8 of ASTM Standard Practice E1527-21, uses of the adjoining properties that are obvious shall be identified to evaluate the likelihood that past uses of the adjoining properties have led to recognized environmental conditions in connection with the subject property. The report shall describe identified obvious uses of adjoining properties, and indicate the earliest dates identified. This task requires reviewing the following standard historical resources if they have been researched for the subject property, provide coverage of one or more adjoining properties, and are likely to be useful in satisfying the objective in Section 8.3.1 of ASTM Standard Practice E1527-21: (1) aerial photographs, (2) fire insurance maps, (3) local street directories, and (4) historical topographic maps. In cases in which any of the preceding four standard historical resources are not reviewed for the adjoining properties but they were reviewed for the subject property, the environmental professional shall indicate in the report why such a review was not conducted.* Review of *standard historical resources*, if available, is provided in the relevant sections of this report. In the event that one or more *standard historical resources* were not discussed for adjoining properties, the environmental professional has determined from other *historical resources* that sufficient information has been obtained to achieve the objective stated in Section 8.3.1 of ASTM Standard Practice E1527-21.
The adjacent vicinity was agricultural land in a 1938 aerial photograph. By 1946 residential development was to the north, northeast, and southeast; agricultural land remained to the east, south, and southwest; and vacant land was to the west and northwest. By 1953 the south and southwest adjacent properties were vacant. By 1959 agricultural land remained to the east and northeast; residential development was to the north and southeast, and vacant land was to the northwest, west, southwest, and south. By 1972 agricultural land was no longer to the east and northeast, and the area was vacant. By 1985 residential development was to the east and northeast. By 1989 a shopping center was to the south and southwest. By 2020, development of the current commercial buildings was in progress to the west and northwest.

The south/southwest-adjacent property has been primarily occupied by a Target store and a CVS Pharmacy. These businesses were listed on databases for hazardous waste generation. There were no reported releases of hazardous substances to the environment identified for this site.
PFAS
There was no evidence from any researched source that the per- and polyfluoroalkyl substances (PFAS) perfluorooctanoic acid or perfluorooctanesulfonic acid were historically used at the Property.
FEDERAL, STATE, AND LOCAL AGENCY RECORDS RESEARCH
The Property was not identified on any researched environmental database. There were no environmental concerns.
POTENTIAL OFF-SITE CONCERNS
No properties within the specified search distances were identified that are assessed to pose significant environmental risk to the Property.
NON-SCOPE ITEMS
Unless the *Client* contracted ODIC to investigate specific Non-Scope or Non-CERCLA items, evaluation of Non-Scope or Non-CERCLA items, including those addressed in Section 3.5 of this Report, is not required nor relevant for compliance with the AAI Rule or ASTM Standard Practice E1527-21.
INACCESSIBLE OR UN-SURVEYED PORTIONS OF THE PROPERTY
Full access to the entire Property was provided to ODIC, and there were no notable portions of the Property excluded from the survey and field inspection.
SIGNIFICANT DATA GAP
No significant data gaps were identified during the course of this assessment.

FINDINGS AND RECOMMENDATIONS

SUMMARY OF FINDINGS

CONCLUSIONS AND FINDINGS

ODIC Environmental (ODIC) performed a Phase I Environmental Site Assessment of the Property in conformance with the scope and limitations of ASTM Standard Practice E1527-21.

ASTM Standard Practice E1527-21 defines a *de minimis condition* as*: a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a de minimis condition is not a recognized environmental condition nor a controlled recognized environmental condition.*

ASTM Standard Practice E1527-21 defines a *Recognized Environmental Condition (REC)* as: *(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of any hazardous substances or petroleum products in, on, or at a the subject property: (1) due to release to the environment; (a release) under conditions indicative of a or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.*

- This environmental assessment has revealed no RECs in connection with the Property.

ASTM Standard Practice E1527-21 defines a *Historical Recognized Environmental Condition (HREC)* as: *a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition.*

- This environmental assessment has revealed no HRECs in connection with the Property.

ASTM Standard Practice E1527-21 defines a *Controlled Recognized Environmental Condition (CREC)* as: *recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).*

- This environmental assessment has revealed no CRECs in connection with the Property.

OTHER ENVIRONMENTAL ISSUES

None were identified.

RECOMMENDATIONS AND OPINIONS

ODIC performed a Phase I Environmental Site Assessment of the Property in conformance with the scope and limitations of ASTM Standard Practice E1527-21.

- ODIC recommends No Further Investigation at this time.

1.0 INTRODUCTION

ODIC Environmental (ODIC) performed a *Phase I Environmental Site Assessment Report* (hereinafter referred as "*Phase I ESA" or "Report"*) of the Property in conformance with the scope and limitations of the *ASTM International*, formerly known as the *American Society for Testing and Materials (ASTM), Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, ASTM Designation E1527-21.*

This *Report* documents the methods and findings of the *Phase I ESA* performed in general conformance with the scope and limitations of ASTM Standard Practice E1527-21 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the Property.

This *Report* has been prepared by ODIC for the *Client* under the professional supervision of the principal and/or senior staff whose seal(s) and signature(s) appear hereon. Neither ODIC, nor any staff member assigned to this investigation has any interest or contemplated interest, financial or otherwise, in the subject or surrounding properties, or in any entity which owns, leases, or occupies the subject or surrounding properties or which may be responsible for environmental issues identified during the course of this investigation, and has no personal bias with respect to the parties involved.

PURPOSE AND OBJECTIVE

The purpose of this practice is to define good commercial and customary practice for conducting an *environmental site assessment* of a parcel(s) of *commercial real estate* with respect to the range of contaminants within the scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) and *petroleum products*. As such, this practice is intended to permit a *User (Client, Purchaser, Lender, Owner)* to satisfy one of the requirements to qualify for the *innocent landowner*, *contiguous property owner*, or *bona fide prospective purchaser* limitations on CERCLA liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"): that is, the practice that constitutes "*all appropriate inquiry* into the previous ownership and uses of the *Property* consistent with good commercial or customary standards and practices" as defined at 42 U.S.C. §9601(35)(B).

Another purpose of this *Phase I ESA* may be to assist the *Client* in its underwriting of a proposed mortgage loan on the Property, if this *Report* is prepared as a part of a pre-financing environmental due diligence, and to identify *Recognized Environmental Conditions (RECs)* in connection with the Property described in this *Report*.

ASTM Standard Practice E1527-21 defines *a Recognized Environmental Condition (REC)* as: *(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of any hazardous substances or petroleum products in, on, or at a the subject property: (1) due to release to the environment; (a release) under conditions indicative of a or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.*

ASTM Standard Practice E1527-21 defines a *Historical Recognized Environmental Condition (HREC)* as: *a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition.*

ASTM Standard Practice E1527-21 defines a Controlled Recognized Environmental Condition (CREC) as: *recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).*

- *OSHA Hazard Communication Regulation, 29 C.F.R. §1910.1200*

SCOPE OF WORK

This *Report* was prepared for the exclusive use of the *Client or User of this Report*. The information reported was obtained through sources deemed reasonably ascertainable, as defined in ASTM Standard Practice E1527-21; a visual survey of areas readily observable, easily accessible or made accessible by the Property contact, and interviews with owners, agents, occupants, or other appropriate persons involved with the Property. Municipal information was obtained through file reviews of reasonably ascertainable standard government record sources, and interviews with the authorities having jurisdiction over the Property. Findings, conclusions, and recommendations included in the *Report* are based on our visual observations in the field, the municipal information reasonably obtained, information provided by the *Client (or User)*, and/or a review of readily available and supplied documents.

The scope of work for this *Phase I ESA* is in general accordance with the requirements of ASTM Standard Practice E 1527-21. This assessment included: 1) Property and adjoining site reconnaissance; 2) interviews with key personnel; 3) a review of standard historical sources; 4) a review of standard regulatory agency records; and 5) a review of a regulatory database report provided by a third-party company such as Environmental Data Resources (EDR).

LIMITATIONS AND EXCEPTIONS

ODIC renders no opinion as to the Property condition at un-surveyed and/or inaccessible portions of the Property, which are described below. ODIC relies completely on the information, whether written, graphic or verbal, provided by the Property contact or as shown on any documents reviewed or received from the Property contact, owner or agent, or municipal source, and assumes that information to be true and correct. The observations in this *Report* are valid on the date of the survey. Where access to portions of

the Property or to structures on the Property was unavailable or limited, ODIC renders no opinion as to the presence of petroleum products or hazardous substances in that portion of the Property or structure. In addition, ODIC renders no opinion as to the presence of, or indirect evidence relating to, petroleum products or hazardous substances where direct observation of the interior walls, floor, or ceiling of a structure was obstructed by objects or coverings on or over these surfaces.

The conclusions provided by ODIC are based on the information obtained by visual survey of the Property, and information provided by agents representing the Property, or agents of the owner. In addition, ODIC has relied on certain information provided by state and other referenced parties, and on information contained in the files of federal, state and/or local agencies available to ODIC at the time of the assessment. Although there may have been some degree of overlap in the information provided by these various sources, ODIC did not attempt to independently verify the accuracy or completeness of all information reviewed or received during the course of these Environmental Services.

CERCLA Requirements Other Than *All Appropriate Inquiry* (ASTM Standard Practice E1527-21 1.1.3) - This practice does not address whether requirements in addition to *All Appropriate Inquiries* have been met in order to qualify for the *LLPs* (specified in 42 U.S.C. §9607(b)(3)(a) and (b) including the continuing obligation not to impede the integrity and effectiveness of *Activity and Use Limitations*), or the duty to take reasonable steps to prevent releases, or the duty to comply with legally required release reporting obligations).

It is acknowledged that ODIC's judgments shall not be based on scientific or technical tests or procedures beyond the Scope of Services or beyond the time and budgetary constraints imposed by the *Client*. It is acknowledged further that ODIC's conclusions shall not rest on pure science but on such considerations as economic feasibility and available alternatives. The *Client* also acknowledges that, because geologic and soil formations are inherently random, variable, and indeterminate in nature, the conclusions and opinion of this *Report* are not guaranteed to be a representation of actual conditions on the Property, which are also subject to change with time as a result of natural or man-made processes, including water permeation.

In performing the Services, ODIC shall use that the degree of care and skill ordinarily exercised by environmental consultants or engineers performing similar services in the same or similar locality. The standard of care shall be determined solely at the time the Services are rendered and not according to standards utilized or in effect at a later date. The Services shall be rendered without any other warranty, expressed or implied, including, without limitation, the warranty of merchantability and the warranty of fitness for a particular purpose.

It should be noted that certain conditions may not have been reasonably identifiable or ascertainable from the available information during the course of this *Report*. ODIC assumes that information obtained from the records review and the interviews concerning the Property is reliable. However, ODIC cannot and does not warrant or guarantee that the information provided by these or other sources is accurate or correct.

Some of the information provided in this *Report* is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This *Report* is subject to the limitations of historical documentation, availability, and accuracy of the pertinent records, and the personal recollections of those persons contacted. This practice does not address requirements of any state or local laws or of any federal laws other than the *All Appropriate Inquiries* provisions of the LLPs. *Users* are cautioned that federal, state, and local laws may impose environmental assessment obligations that are beyond the scope of this practice. *Users* should also be aware that there are likely to be other legal obligations with regard to hazardous substances or petroleum products discovered in, on, or at the Property that are not addressed in this practice and that may pose risks of civil and/or criminal sanctions for non-compliance. This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety, health, and environmental practices and determine the applicability of regulatory limitations prior to use.

Furthermore, this *Report* does not intend to address health and safety concerns, if any, associated with the Property.

The *Phase I ESA* was conducted in a manner consistent with the level of care and skill ordinarily exercised by members of the profession, and in accordance with generally accepted practices of other consultants currently practicing in the same locality under similar conditions. No other representation, expressed or implied, and no warranty or guarantee is included or intended. The *Report* speaks only as of its date, in the absence of a specific written update of the *Report*, signed and delivered by ODIC.

Controlled substances are not included within the scope of this standard. Persons conducting an *environmental site assessment* as part of an EPA Brownfields Assessment and Characterization Grant awarded under CERCLA 42 U.S.C. §9604(k)(2)(B) must include controlled substances as defined in the Controlled Substances Act (21 U.S.C. §802) within the scope of the assessment investigations to the extent directed in the terms and conditions of the specific grant or cooperative agreement. Additionally, an evaluation of *business environmental risk* associated with a parcel of *commercial real estate* may necessitate investigation beyond those identified in this practice.

SIGNIFICANT ASSUMPTIONS AND LIMITING CONDITIONS

The objective of ASTM Standard Practice E1527-21 is to help *Users* qualify for one of the CERCLA Landowner Liability Protections (LLPs). *Users* should be aware that there are other federal, state, and local environmental laws and regulations that can impose liabilities and obligations on owners and operators of real property that are outside the scope of this practice. This practice does not address all possible environmental liabilities that a *User* may need to consider in the context of a commercial real estate transaction. Therefore, *Users* may desire to expand the scope of pre-purchase or pre-finance due diligence to assess other business environmental risks that exist beyond CERCLA liability associated with the Property.

Business Environmental Risk (BER) is a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice. Consideration of BER issues may involve addressing one or more non-scope considerations. Evaluation of Non-Scope or Non-CERCLA items, including those addressed in this *Report*, is not required nor relevant for compliance with the AAI Rule or ASTM Standard Practice E1527-21. Inclusion of any non-scope item in a Phase I Environmental Site Assessment report is entirely within the discretion of the *User* based on its own risk tolerance. Non-Scope Consideration should not be construed as requiring the inclusion of any non-scope issues in a Phase I Environmental Site Assessment report.

Any additional services contracted for between the *User* and ODIC including a broader scope of assessment, more detailed conclusions, liability/risk evaluations, recommendation for Phase II testing or other assessment activities, remediation techniques, etc., are beyond the scope of ASTM Standard Practice E1527-21, not part of this *Report*, and should only be included in the *Report* if so specified in the terms of engagement between the *User* and ODIC. Such additional services may include *business environmental risk* issues not included within the scope of this practice (ASTM Standard Practice E1527-21).

ASTM Standard Practice E1527-21 does not encompass analytical testing to evaluate Asbestos Containing Materials (ACM), radon, lead-based paint (LBP), drinking water quality, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, biological agents, mold, stored chemicals, debris, fill materials, surface water, or subsurface samples (soil and groundwater) as part of a Phase I ESA. Such additional information regarding non-ASTM Standard Practice E1527-21 issues may be provided merely for the *User's* convenience, and cannot be used to bind this *Report* as a whole to the compliance and conformance with ASTM Standard Practice E1527-21. No disassembly of systems or

building components or physical or invasive testing is to be performed unless the *Client* specifically calls for such testing as an additional scope of work.

ODIC has performed this *Phase I ESA* in conformance with the scope and limitations of ASTM Standard Practice E1527-21. This *Report* may not include all environmental conditions which can materially impact the Property other than those defined as RECs in ASTM Standard Practice E1527-21.

ODIC is not contracted to perform *Environmental Liens* and *Activity and Use Limitations (AULs)* searches via title records, and such is beyond the scope of services included in this *Report*. Information pertaining to deed restrictions and environmental liens, Activity/Use Limitations, title search/report was requested from the *Report User*. This information may or may not be provided to ODIC at the time of the assessment. See pertinent sections of this *Report* for further discussion.

Interviews with past or current owners, operators, and occupants may not be reasonably ascertainable and can constitute a data gap. Based on information obtained from other historical sources (as discussed in Section 4.0), this data gap may or may not be expected to alter the findings of this assessment.

Adjoining sites, neighboring sites, or surrounding properties mentioned in this *Report* are defined only up to one parcel immediately next to the Property, and ODIC will only evaluate immediately adjoining properties to identify historical use of the surrounding areas via historical sources or data available for adjoining properties, and/or walk-through visual inspection along the property perimeters to identify obvious signs of environmental concerns.

It is often not possible (under the "*reasonably ascertainable*" clause of the ASTM Standard Practice E1527-21) to identify every single historical business tenant or occupant of the Property. ODIC cannot be liable for not identifying all such past tenants or occupants of the Property.

This ESA did not necessarily comply with the ASTM Standard Practice E2600-15 "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions." For assessment of potential "vapor encroachment conditions" (VECs) and to determine if a "vapor intrusion condition" (VIC) exists on-site, additional investigation beyond ASTM Standard Practice E1527-21 is required.

For the purposes of ASTM Standard Practice E1527-21, "migrate" and "migration" refers to the movement of *hazardous substances* or *petroleum products* in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface.

USER RELIANCE

This investigation was conducted in accordance with the *Client's* Environmental Site Assessment scope of work for the use and benefit of the *Client* and assignees. It is based, in part, upon documents, writings, and information owned, possessed, or secured by the *Client*. Neither this *Report*, nor any information contained herein, shall be used or relied upon for any purpose by any other person or entity without the express written permission of the *Client*.

All reports, both verbal and written, are for the sole use and benefit of the *Client*. Either verbally or in writing, third parties may come into possession of this *Report* or all or part of the information generated as a result of this work. In the absence of a written agreement with ODIC granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against ODIC, its officers, employees, vendors, successors or assigns. Any such unauthorized user shall be responsible to protect, indemnify and hold ODIC, the *Client* and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such use. Unauthorized use of this *Report* shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

INDEPENDENT CONTRACTOR STATUS / PROFESSIONAL RESPONSIBILITY

In performing Services under the mutually agreed contractual agreement and engagement, ODIC operates as, and has the status of, an independent contractor. Subject to any limitations established by the *Client* as to the degree of care and amount of time and expenses to be incurred and any other limitations contained in the mutually agreed contractual agreement and engagement, ODIC performs the Services consistent with the level of care and skill ordinarily exercised by other professional consultants under similar circumstances at the time the Services are performed. *Client* hereby acknowledges that whenever a Project involves hazardous or toxic materials there are certain inherent risk factors involved (such as limitations on laboratory analytical methods, variations in subsurface conditions, economic loss to *Client* or Property owner, a potential obligation for disclosure to regulatory agencies, a potential for a decrease in market value of real property, and the like) that may adversely affect the results of the Project, even though the Services are performed with such skill and care. No other representation, warranty, or guarantee, express or implied, is included or intended by the mutually agreed contractual agreement and engagement.

QUALIFICATION STATEMENT OF ENVIRONMENTAL PROFESSIONAL

ODIC states that this ESA was performed under *Environmental Professional (EP)'s* direct supervision, that he/she has prepared and/or reviewed and approved the *Report*, and that the methods and procedures utilized in the development of this *Report* conform at least to minimum industry standards using both the *ASTM International*, formerly known as the *American Society for Testing and Materials (ASTM)*, Standard Practice E1527-21 and the United States – Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) as guidelines. ODIC certifies that ODIC's *Environmental Professionals* and *Subcontractors* are properly licensed, qualified, and/or certified to conduct *Phase I Environmental Site Assessments*.

ODIC's EP declares that, to the best of his/her professional knowledge and belief, he/she meets the definition of *Environmental Professional* as defined in 40 CFR Part 312. ODIC's EP who prepared this assessment possesses the specific qualifications based upon education, training and experience to assess a property of the nature, history, and setting of the Property. ODIC has performed the "*All Appropriate Inquiries*" in accordance with the standards and practices as defined in 40 CFR Part 312.

2.0 PROPERTY DESCRIPTION

2.1 PROJECT INFORMATION

Project Information	
ITEM	
Project Number	6385301-ESAI
Property Address(es)	The Property addresses are 1608 and 1624 Philadelphia Street, Ontario, San Bernardino County, CA 91761.
Historical/Alternate Property Addresses	None were identified.
	Source: N/A
Tax Assessor's Parcel Numbers	1014-591-04-0000 1014-591-05-0000
Property Inspection Date	April 9, 2026
Weather Condition	Cloudy, approximately 65 degrees Fahrenheit
Site Visit Conducted by	Jennifer Hoff, Environmental Consultant
Report Author	Jennifer Hoff, Environmental Consultant
QA/QC Environmental Professional	Michael A. Miller, M.S., Senior Environmental Consultant
Property Location	The Property is located on the northwest corner of the intersection of Philadelphia Street and South Benson Avenue.
General Setting	Commercial and residential

2.2 PROPERTY IMPROVEMENTS

Property Improvements and Building / Land Description	
ITEM	
Property Description	The Property consists of two adjoining undeveloped parcels that total 2.44 acres.
	Data Source for Parcel Size(s): Property Detail Report
Estimated Year of Construction	Not applicable
Improvement Description	Not applicable
	See Property Description above for additional details. See also appended photographs and site plot plan.
Other Improvements & Features (including description of unimproved areas)	The Property is undeveloped land.

2.3 PROPERTY OCCUPANTS AND USE

Property Occupants and Use	
ITEM	
Present Occupant(s) and Detailed Description of Business Operation(s)	There are no occupants. The Property is undeveloped land.

2.4 MUNICIPAL SERVICES AND UTILITIES

Municipal Services and Utilities	
ITEM	
Potable Water Supply	None were identified.
Natural Gas Utility Provider	None were identified.
Electrical Utility Provider	None were identified.
Sewage Disposal System	None were identified.
Solid Waste Disposal	None were identified
Any Septic System, Cesspool, Seepage Pits	None were identified.
Private Water Well	None were identified.
Heating/Cooling System	None were identified.

2.5 PHYSICAL SETTING

TOPOGRAPHY

The Property's physical location was researched employing a United States Geological Survey (USGS) 7.5-Minute Topographic Quadrangle (Quad) Map relevant to the Property. The USGS 7.5-Minute Quad Map has an approximate scale of 1 inch to 2,000 feet, and may show physical features with environmental significance such as wetlands, water bodies, roadways, mines, and buildings. The elevation of the Property is approximately 835 feet above mean sea level. There is a regional downslope to the south.

GEOLOGY AND HYDROGEOLOGY

Geologic and hydrogeologic information was obtained from a 2019 Phase II Soil and Soil Vapor Site Investigation Report prepared for a site at 5483-B Philadelphia Street, located approximately 1,000 feet southwest of the Property:

> *The Site is located within the United States Geological Survey (USGS) Ontario 7.5-minute series topographic map. Based on Google Earth data, the Site elevation is approximately 815 feet above mean sea level (amsl) and relatively flat.*
>
> *Based on investigative activities performed by Apex Companies, EMG Corp. and Ferro Engineering, soils beneath the Site typically consist of poorly graded fine sand and silty sand from 1 to 21 ft. bgs, silt from 21 to 26 ft. bgs, poorly graded sand with silt and silty sand from 26 to 29 ft. bgs, and silt from 29 to 30 ft. bgs. These soil descriptions are characteristic of alluvial gravel and sand of valley areas as described in the 2002 Geologic Map of the San Dimas and Ontario Quadrangles published by the Dibblee Geological Foundation.*
>
> *Groundwater has not been encountered during any investigative activity to date with maximum drilling depths of 30 feet below ground surface (bgs). A review of information from individual sites in the area listed on the California State Water Board GEOTRACKER website indicated that the depth to groundwater in the vicinity of the project Site is approximately 250 ft. bgs with a southerly flow direction.*

> *According to the California Water Quality Control Board – Santa Ana Region Water Quality Control Plan (June 2011), the Site is located in the Chino 1 Groundwater Management Zone with beneficial uses listed as municipal (MUN), agricultural (AGR), industrial (IND), and industrial process (PROC).*

Source:
https://www.envirostor.dtsc.ca.gov/getfile?filename=/public%2Fdeliverable_documents%2F5965334832%2FCTS%20Site%20Investigation%20Report%20-%20January%202019%20Revision-FINAL.pdf

While groundwater flow direction at the Property cannot be confirmed without survey measurement of static groundwater level at triangulated points, it is expected to flow in the direction of surface topographical contour, or toward the nearest water body or discharge basin.

It is important to note that groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

3.0 PROPERTY RECONNAISSANCE

3.1 LIMITING CONDITIONS

The information reported herein was obtained through sources deemed reliable, a visual site survey of areas readily observable, easily accessible or made accessible by the Property contact, and interviews with owners, agents, occupants, or other appropriate persons involved with the Property.

No limitations imposed by physical obstructions such as adjacent buildings, bodies of water, asphalt, or other paved areas, and other physical constraints were identified unless indicated below.

No disassembly of systems or building components or physical or invasive testing was performed. ODIC renders no opinion as to the Property condition at un-surveyed and/or inaccessible portions of the Property. ODIC relies completely on the information, whether written, graphic, or verbal, provided by the Property contact or as shown on any documents reviewed or received from the Property contact, owner or agent, or municipal source, and assumes that information to be true and correct. The observations in this *Report* are valid on the date of the Property reconnaissance. Note: Typically lenders have environmental policies where due diligence reports are valid for one year from the report date. However, such policies and standards can vary from each lender or *User*. For CERCLA landowner liability protection, Phase I ESA reports are valid for 180 days, per ASTM Standard Practice E1527-21.

3.2 PROPERTY RECONNAISSANCE

ODIC conducted interior and exterior observations of the Property with the intent to identify *releases* or *material threat* of future *releases* of *hazardous substances* or *petroleum products* to the *environment*. The table below lists items *visually and/or physically observed*.

PROPERTY RECONNAISSANCE
Hazardous Substances and Petroleum Products
None were observed.
Underground Storage Tanks (USTs), vent pipes, fill pipes, or access ways indicating USTs
None were observed.
Aboveground Storage Tanks (ASTs)
None were observed.
Drums, Totes, and Intermediate Bulk Containers
None were observed.
Standing Surface Water and Pools or Sumps Containing Liquids Likely to be Hazardous Substances or Petroleum Products
None were observed.
Hazardous Substance and Petroleum Product Containers Not in Connection With Identified Uses
None were observed.
Unidentified Substance Containers
None were observed.
Stains or Corrosion on Floors, Walls, or Ceilings (except for staining from water)
None were observed.
Stained Soil or Pavement

None were observed.
Drains, Sumps, Wastewater Treatment Units, Clarifiers
None were observed.
Pits, Ponds, or Lagoons
None were observed.
Stressed Vegetation (other than from insufficient water).
None were observed.
Areas that are apparently graded by non-natural causes (or filled with fill of unknown origin) suggesting trash, construction debris, demolition debris, or other solid waste disposal; and mounds or depressions suggesting trash or other solid waste disposal.
None were observed.
Water/Wastewater—Wastewater or other liquid (including stormwater) discharged from or to the Property.
None were observed, other than typical stormwater runoff.
Wells (including dry wells, irrigation wells, injection wells, monitoring wells, abandoned wells, or other wells).
None were observed.
Septic Systems or Cesspools
None were observed.
Unusual Areas of Pavement Patching (including possible boring locations)
None were observed.

3.3 Detailed Description of Site Reconnaissance and Environmental Conditions

The Property is undeveloped land. No environmental concerns were observed during the Property reconnaissance.

3.4 Current Uses of Adjoining Properties

For the scope of this assessment, properties are defined and categorized based upon their physical proximity to the Property. An adjoining property is defined as any real property or properties the border of which is contiguous or partially contiguous with that of the Property, or that would be contiguous or partially contiguous with that of the Property but for a street, road, or other public thoroughfare separating them.

Adjoining Properties	
ITEM	
North	North of the Property is a residence at 2122 South Benson Avenue.
Northeast	Northeast of the Property is South Benson Avenue, followed by a residence at 2125 South Benson Avenue.
East	East of the Property is South Benson Avenue, followed by residences at 2135, 2145, and 2155 South Benson Avenue.
Southeast	Southeast of the Property is South Benson Avenue, followed by a residence at 5709 Philadelphia Street

South / Southwest	South and southwest of the Property is Philadelphia Street, followed by a shopping center at 5555 Philadelphia Street. The nearest business to the Property is a Target store.
West	West of the Property is an office building at 5632 Philadelphia Street.
Northwest	Northwest of the Property is an office building at 5624 Philadelphia Street.

3.5 NON-SCOPE (NON-ASTM) CONSIDERATIONS

Evaluation of Non-Scope or Non-CERCLA items, including those addressed in Section 3.4 of this *Report*, is not required nor relevant for compliance with the AAI Rule or ASTM Standard Practice E1527-21. Inclusion of any non-scope item in a Phase I Environmental Site Assessment report is entirely within the discretion of the *User* based on its own risk tolerance. Non-Scope Consideration should not be construed as requiring the inclusion of any non-scope issues in a Phase I Environmental Site Assessment report.

Any additional services contracted for between the *User* and ODIC Environmental including a broader scope of assessment, more detailed conclusions, liability/risk evaluations, recommendation for Phase II testing or other assessment activities, remediation techniques, etc., are beyond the scope of Standard Practice E1527-21, are not part of this *Report*, and should only be included in the *Report* if so specified in the terms of engagement between the *User* and ODIC. Such additional services may include *business environmental risk* issues not included within the scope of this practice (ASTM Standard Practice E1527-21). No implication is intended as to the relative importance of inquiry into such non-scope considerations, and this list of non-scope considerations is not intended to be all-inclusive.

There may be environmental issues or conditions at a *Property* that parties may wish to assess in connection with *commercial real estate* that are outside the scope of this practice (the non-scope considerations). As noted by the legal analysis in Appendix X1 of ASTM Standard Practice E1527-21, some substances may be present on the Property in quantities and under conditions that may lead to contamination of the *Property* or of nearby properties but are not included in CERCLA's definition of *hazardous substances* (42 U.S.C. §9601(14)) or do not otherwise present potential CERCLA liability. In any case, they are beyond the scope of this practice.

Whether or not a *User* elects to inquire into non-scope considerations in connection with this practice or any other *environmental site assessment*, no assessment of such non-scope considerations is required for appropriate inquiry as defined by this practice.

NON-SCOPE, NON-CERCLA ITEMS	
ITEM	
Suspect asbestos-containing building materials (ACBM) unrelated to releases into the environment	Not applicable – the Property is undeveloped land.
Lead-based paint (LBP) unrelated to releases into the environment	Not applicable – the Property is undeveloped land.

NON-SCOPE, NON-CERCLA ITEMS	
ITEM	
Lead in drinking water (LIW)	Since a lead in drinking water survey is not included in the scope of services for this Phase I Environmental Site Assessment, ODIC did not test drinking water at the Property for lead content. The major source of LIW is leaching of lead from household plumbing materials or water service lines used to bring water from the main to the building. Lead can leach into drinking water through contact with the plumbing, solder, fixtures and faucets (brass), and fittings. The amount of lead in drinking water will be influenced by the type and amount of minerals in the water, how long the water stays in the pipes, the amount of wear in the pipes, the water's acidity and its temperature.
Naturally-occurring radon	Since a radon survey is not included in the scope of services for this Phase I ESA, ODIC did not test for radon at the Property. Radon is a naturally-occurring, odorless, invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings. A review of the EPA's Map of Radon Zones indicates that San Bernardino County falls within Zone 2, a zone of moderate radon potential. Counties located within Zone 2 have a predicted average indoor radon screening level of 2 to 4 picocuries per liter (pCi/L), generally below EPA's radon action level of 4 pCi/L for residential structures. A radon survey was not included in the current scope of services. *Source: https://www.epa.gov/radon/state-maps-radon-zones* It should be noted that site-specific radon levels can vary greatly within the EPA radon zones and on-site radon measurements would need to be conducted in order to determine the Property radon levels.
PCB-containing building materials	Not applicable – the Property is undeveloped land.
Wetlands, creeks, swale, pits, ponds, lagoons, or any other water bodies	A wetland is defined as areas inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands provide a number of economically and environmentally important functions such as flood control, water quality protection, groundwater recharge, spawning areas for commercially important fish, and wildlife habitat. Wetlands are evaluated using three indicators: hydrology, hydrophytic vegetation, and hydric soils. Section 404 of the Clean Water Act requires a permit before dredged or fill material may be discharged into regulated wetlands (known as Jurisdictional Wetlands). The Army Corps of Engineers has primary responsibility for making wetlands jurisdictional determinations and issuing wetlands permits. A number of activities are authorized through the use of nationwide permits. A wetland study or survey is not included in the current scope of services for this Phase I ESA.

NON-SCOPE, NON-CERCLA ITEMS	
ITEM	
Mold or microbial growth conditions	Not applicable – the Property is undeveloped land.
Indoor air quality unrelated to releases of hazardous substances or petroleum products into the environment	Not applicable – the Property is undeveloped land.
Flood Zone	The Federal Emergency Management Agency Flood Insurance Rate Map is typically used to determine if the Property is located within a flood zone. A flood zone evaluation is not included in the scope of work for this Phase I ESA. Per the EDR Radius Map Report, the Property is not within a 100-year or 500-year flood zone.
Methane Gas	Since a methane gas survey is not included in the scope of services for this Phase I ESA, ODIC did not test for methane gas at the Property.

NON-SCOPE, NON-CERCLA ITEMS	
ITEM	
Other non-scope considerations discussed in Appendix X1 and Appendix X5 of ASTM Standard Practice E1527-21	No implication is intended as to the relative importance of inquiry into such non-scope considerations, and this list of non-scope considerations is not intended to be all-inclusive. These items are not included in the current scope of services for this Phase I ESA. *Endangered Species Act*—Under the Endangered Species Act (ESA), the government protects endangered and threatened plants and animals (listed species) and their habitats. The presence of listed species can restrict use of the Property to ensure that the proposed activities do not adversely affect endangered or threatened species as well as their critical habitats. This includes *Biological agents, Cultural and historical resources, and* Ecological resources. *Compliance with AULs*—Parties who wish to qualify for one of the *LLPs* will need to know whether they are in compliance with AULs, including land use restrictions that were relied upon in connection with a response action. A determination of compliance with AULs is beyond the scope of ASTM Standard Practice E1527-21. *Regulatory Compliance (Includes Health and Safety and Industrial Hygiene)*—Properties used for industrial, commercial and even residential purposes are frequently subject to a panoply of environmental laws and regulations that relate to many aspects of operations conducted at the Property. In the context of a property transaction, noncompliance with environmental laws and regulations may create a material risk of financial loss for both building operators and owners of the properties. *Potential Effects of Noncompliance*—Depending on the circumstances, noncompliance with various regulatory requirements could result in material costs to owners and operators of industrial, commercial or residential properties, including fines or other monetary penalties, injunctions or other equitable relief that slows or eliminates productivity, and could result in increased transaction costs associated with defending claims of noncompliance. Furthermore, even in the absence of administrative or legal enforcement proceedings, the costs to bring facilities into compliance with applicable regulatory requirements could be material in some circumstances.

4.0 PROPERTY AND VICINITY HISTORY

The objective of consulting historical sources is to develop a history of the previous uses of the Property and surrounding area, in order to help identify the likelihood of past uses having led to Recognized Environmental Conditions (RECs), Controlled Recognized Environmental Conditions (CRECs), or Historical Recognized Environmental Conditions (HRECs) in connection with the Property. ODIC exercises professional judgment and consider the possible *releases* that might have occurred at a Property in light of the historical uses and, in concert with other relevant information gathered as part of the Phase I process, to use this information to assist in identifying RECs, CRECs, and/or HRECs in connection with the Property. Historical Records Search was conducted for the Property in conformance with the scope and limitations of ASTM Standard Practice E1527-21.

4.1 PREVIOUS ENVIRONMENTAL REPORTS

Previous environmental reports were not available for the Property.

4.2 SANBORN MAP COMPANY FIRE INSURANCE MAPS

Sanborn Map Company maps were created for insurance underwriters from 1867 to present, and often contain information regarding the uses of individual structures, and the locations of fuel and/or chemical storage tanks that may have been on a particular property. In 1996, the entire Sanborn Map Company collection was acquired by Environmental Data Resources, Inc. (EDR). ODIC subcontracted with EDR to provide copies of Sanborn Map Company maps, if available, for the Property and vicinity.

EDR responded that Sanborn Map Company fire insurance maps were not available for the Property or vicinity.

4.3 HISTORICAL AERIAL PHOTOGRAPHS

ODIC reviewed historical aerial photographs supplied by the EDR Aerial Photo Decade Package. Photographs were available for the following years: 1938, 1946, 1948, 1953, 1959, 1966, 1972, 1975, 1985, 1989, 1990, 1994, 2002, 2006, 2009, 2012, 2016, 2020, and 2024.

<u>Property</u>

- 1938: The Property is agricultural land.
- 1946-1948: The Property remains agricultural and is developed with a dwelling on the southeast portion.
- 1953: The Property remains developed with a dwelling and the remainder is vacant.
- 1959-1990: The Property is developed with two dwellings and outbuildings on the southern portion.
- 1994-2024: The Property is vacant.

<u>Adjacent</u>

- 1938: The adjacent vicinity is agricultural land.
- 1946: The adjacent vicinity is a mixture of agricultural land and residential development to the north, northeast and southeast; agricultural land to the east, south, and southwest; and vacant land to the west and northwest.
- 1953: The south and southwest adjacent vicinity are now vacant. No other significant changes were observed.

- 1959-1966: Agricultural land remains to the east and northeast; residential development is to the north and southeast, and vacant land is to the northwest, west, southwest, and south.
- 1972-1975: Agricultural land is no longer to the east northeast and the area is vacant. No other significant changes were observed.
- 1985: Residential development is to the east and northeast. No other significant changes were observed.
- 1989-2016: A shopping center is to the south and southwest. No other significant changes were observed.
- 2020-2024: Development of commercial buildings is in progress to the west and northwest. No other significant changes were observed.

4.4 Local Street Directories / Historical City Directories

ODIC reviewed Historical City Directories provided by EDR for the years spanning 1931-2024. A summary of listings for the Property is provided below:

Historical City Directories **Property Address: 1608 and 1624 Philadelphia Street**	
YEAR	LISTINGS
1970-1991	Residential listings

The north-adjacent property at 2122 South Benson Avenue was listed as residential from 1964 to 1990, and as mixed-use residential and commercial from 1990 to 2024.

The northeast-adjacent property at 2125 South Benson Avenue was listed as residential from 1985 to 2024.

The east-adjacent property at 2135 South Benson Avenue was listed as residential from 1995 to 2024.

The east-adjacent property at 2145 South Benson Avenue was listed as residential from 1985 to 2010, and as mixed-use residential and commercial from 2014 to 2024.

The east-adjacent property at 2155 South Benson Avenue was listed as residential from 1995 to 2017.

The southeast-adjacent property at 5709 Philadelphia Street was listed as residential from 1985 to 2024.

The south/southwest-adjacent property at 5555 Philadelphia Street was initially listed as residential, and was listed as Target Store from 1990 to 2024 and as CVS Pharmacy from 2017 to 2024.

4.5 City/County Building Department, Zoning/Land Use, Property Tax Records, Profiles

Building Department Records:

Records were obtained from the City of Ontario building department. A summary of pertinent information is provided below:

Building Department Records	
YEAR	DESCRIPTION
1973	Permit for a garage

Building Department Records	
YEAR	DESCRIPTION
1991	Permit to demolish a house

Property Profile:

ODIC obtained the following Property information from title company property profiles:

- Property Address: 1608 Philadelphia Street
- Current Property Owner: Automobile Club of Southern California
- Assessor Parcel Number: 1014-591-04-0000
- Lot Size: 1.10 acres
- Building Size: Not provided / Not applicable
- Construction Date: Not provided / Not applicable
- Site Use / Use Code: Commercial Lot

- Property Address: 1624 Philadelphia Street
- Current Property Owner: Automobile Club of Southern California
- Assessor Parcel Number: 1014-591-05-0000
- Lot Size: 1.34 acres
- Building Size: Not provided / Not applicable
- Construction Date: Not provided / Not applicable
- Site Use / Use Code: Commercial Lot

4.6 HISTORICAL TOPOGRAPHIC MAPS

Development history of the Property and surrounding area was researched using historical 7.5-Minute USGS topographic maps provided by EDR for the years spanning 1897 to 2021. No features of environmental concern were identified.

4.7 OIL & GAS MAPS

ODIC reviewed the Geologic Energy Management Division's (CalGEM) online mapping application Well Finder maps for the Property and immediate vicinity via the CalGEM Online Mapping System. No active or abandoned oil and/or gas wells were identified on the Property or in the immediate vicinity.

Source: https://www.conservation.ca.gov/calgem/Pages/WellFinder.aspx

4.8 OTHER HISTORICAL RECORDS

This category includes, but is not limited to: maps, newspaper archives, internet sites, community organizations, local libraries, historical societies, and/or other sources.

An internet search of the Property address(es) was conducted to identify additional former Property occupants and/or uses that may not have been identified via other sources. None were identified.

5.0 STANDARD ENVIRONMENTAL RECORDS RESEARCH

5.1 PROCEDURE

The most current databases sources maintained by state and federal offices were provided by governmental record search database suppliers, such as Environmental Data Resources (EDR). For definitions of database acronyms, review the database report in Appendix C and/or refer to ASTM Standard Practice E1527-21, Sections 3.3 and 8.2.

Database sources maintained by local offices were obtained via records requests. Databases were searched for properties with reported environmental listings within distances specified by ASTM Standard Practice E1527-21, either by using geocoding information that identified the coordinates of the properties in the databases or by checking the street addresses of practically reviewable non-geocoded "orphan" properties within the same zip code. The database report is included as an appendix to this *Report*. The database report may identify certain "orphan sites" which are those facilities that could not be mapped or geocoded due to inadequate address information. ODIC cannot be held liable for not correctly locating these orphan sites to determine their impact to the Property.

ASTM Standard Practice E1527-21 Sections 3.3 and 8.2 use terminology such as Leaking Storage Tank and Registered Storage Tank to refer to both Leaking Underground/Aboveground Storage Tanks and Underground/Aboveground Storage Tanks. For the purposes of this assessment, ODIC has used state-specific terminology to refer to Leaking Storage Tanks and/or other Registered Storage Tanks as generally defined by the state in which the Property is located.

5.2 PROPERTY LISTING(S)

FEDERAL AGENCY LISTINGS		STATE AGENCY LISTINGS	
DATABASE	**PROPERTY LISTED**	**DATABASE**	**PROPERTY LISTED**
NPL	No	State/Tribal Equivalent NPL	No

LISTING	ADDRESS	DISTANCE
Target Store T0258 / CVS Pharmacy	5555 Philadelphia Street	SSW 0 – 1/8

This site is south and southwest of the Property and is listed on the RCRA Large Quantity Generator (LQG) and Very Small Generator (VSQG) databases in association with hazardous waste generation. Per the DTSC-HWTS database, the wastes were reported:

- Alkaline solution with metals
- Alkaline solution without metals
- Unspecified alkaline solution
- Aqueous solution containing reactive anions
- Unspecified aqueous solution
- Off-specification, aged or surplus inorganics
- Other inorganic solid waste
- Unspecified solvent mixture
- Waste oil and mixed oil
- Pharmaceutical waste
- Off-specification, aged, or surplus organics
- Organic liquids with metals
- Unspecified organic liquid mixture
- Other organic solids
- Photochemicals / Photoprocessing waste
- Laboratory waste chemicals
- Liquids with PH<=2
- Liquids with PH<=2 with metals
- Detergent and soap
- Latex waste

No releases of hazardous substances to the environment have been reported.

5.4 SURROUNDING SITES: STATE AGENCY LISTINGS

STATE ENVIRONMENTAL AGENCY LISTINGS		
DATABASE	**MINIMUM SEARCH DISTANCE (MILES)**	**PROPERTIES IDENTIFIED WITHIN SEARCH DISTANCE**
State/Tribal Equivalent NPL	1.0	0
State/Tribal Equivalent CERCLIS	0.5	4
State/Tribal SWLF	0.5	1
State/Tribal Leaking Storage Tank	0.5	4
State/Tribal Registered Storage Tank	Adjoining Sites	0
State/Tribal IC/EC Registries	Adjoining Sites	0
State/Tribal Voluntary Cleanup Sites	0.5	2
State/Tribal Brownfield Sites	0.5	0
State/Tribal CPS / SLIC (CA only)	0.5	0
Other State Listings	Adjoining Sites	5
Other Non-ASTM Listings	Adjoining Sites	0

State/Tribal Equivalent CERCLIS - ENVIROSTOR:

LISTING	ADDRESS	DISTANCE
Chino Town Square	5525 Philadelphia Street	SSW 1/8 – 1/4
County Fair Shopping Center	12051 and 12075 Central Avenue	W 1/4 – 1/2
San Antonia – Chino	Not provided	SSE 1/4 – 1/2
New Elementary School	Francis / Oaks Avenue	NNE 1/4 – 1/2

Chino Town Square: This shopping center is adjacent to the south and southwest of the Property. The listing pertains to a drycleaner located approximately 1,000 feet southwest of the Property (within the center). Per review of the ENVIROSTOR database, soil and soil vapor have been impacted in the immediate vicinity of the site. However, it does not impact the Property. This site is not assessed to pose environmental risk to the Property.

Source: https://www.envirostor.dtsc.ca.gov/public/profile_report?global_id=60002480

The remaining sites listed above are not assessed to pose environmental risk to the Property based on their distances.

State/Tribal SWLF (Solid Waste Facilities/Landfill Sites) / WMUDS / SWAT:

LISTING	ADDRESS	DISTANCE
Wolfinbarger, O.F.	5675 Francis Street	N 1/4 – 1/2

Refer to the LUST section below.

State/Tribal LST (Leaking Storage Tank) – LUST (Leaking Underground Storage Tank):

LISTING	ADDRESS	DISTANCE
Wolfinbarger, O.F.	5675 Francis Street	N 1/4 – 1/2
Unocal / United Pacific	12077 Central Avenue	W 1/4 – 1/2
Texaco Service Station	12080 Central Avenue	W 1/4 – 1/2
Chino Valley Car Wash	11797 Central Avenue	NW 1/4 – 1/2

The LUST sites are not assessed to pose environmental risk to the Property based on their distances and case-closed statuses.

State/Tribal VCP (Voluntary Cleanup Program):

LISTING	ADDRESS	DISTANCE
Chino Town Square	5525 Philadelphia Street	SSW 1/8 – 1/4
County Fair Shopping Center	12051 and 12075 Central Avenue	W 1/4 – 1/2

Refer to the ENVIROSTOR section above.

Other State Listings – Resource Conservation Recovery Act -NonGenerator (RCRA-NonGen):

LISTING	ADDRESS	DISTANCE
Aaron Okaura	11464 Benson Avenue	S 0 – 1/8
Nelly Tapley	2155 South Benson Avenue	ESE 0 – 1/8

Aaron Okaura: This site is adjacent to the south of the Property. Per the DTSC-HWTS database, there was no reported hazardous waste generation.

Source: https://hwts.dtsc.ca.gov/facility/CAC003134080

Nelly Tapley: This site is adjacent to the southeast of the Property. Per the DTSC-HWTS database, there was no reported hazardous waste generation.

Other State Listing - CERS HAZ WASTE (California Environmental Reporting System Hazardous Waste):

LISTING	ADDRESS	DISTANCE
Chino Benson Reservoir	11840 Benson Avenue	S 0 – 1/8
Target Store	5555 Philadelphia Street	SSW 0 – 1/8

Chino Benson Reservoir: This site is adjacent to the south of the Property and is listed database in association with hazardous waste generation. The business was not identified on the DTSC-HWTS database. No releases of hazardous substances to the environment have been reported for this site.

Target Store: This site is adjacent to the south and southwest of the Property and is listed on the CERS HAZ WASTE database in association hazardous waste generation. Refer to the RCRA Generator section above for further details.

Other State Listings – San Bernardino County Permits:

LISTING	ADDRESS	DISTANCE
Valley Tropicals	11330 Benson Avenue	S 0 – 1/8
Target Store T0258	5555 Philadelphia Street	SSW 0 – 1/8

Valley Tropicals: This site is adjacent to the south of the Property and is listed in association with hazmat handler permits. No releases of hazardous substances to the environment have been reported for this site.

Target Store: This site is adjacent to the south and southwest of the Property and is listed in association hazardous waste generator and hazmat handler permits. Refer to the RCRA Generator section above for further details.

Other State Listings – E Manifest:

LISTING	ADDRESS	DISTANCE
Target Store T0258	5555 Philadelphia Street	SSW 0 – 1/8

This site is listed in association with hazardous waste generation. Refer to the RCRA Generator section above for further details.

5.5 VAPOR ENCROACHMENT CONDITION

ODIC performed a Phase I Environmental Site Assessment of the Property in conformance with the scope and limitations of ASTM Standard Practice E1527-21. It should be noted that ASTM Standard Practice E1527-21 does not necessarily comply with the ASTM Standard Practice E2600-15 "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions." For assessment of potential "vapor encroachment conditions" (VECs) and to determine if a "vapor intrusion condition" (VIC) exists on-site, additional investigation beyond ASTM Standard Practice E1527-21 is required.

For the purposes of ASTM Standard Practice E1527-21, "migrate" and "migration" refers to the movement of *hazardous substances* or *petroleum products* in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface. Vapor migration in the subsurface is described in ASTM Standard Practice E2600; however, nothing in this practice (ASTM Standard Practice E1527-21) should be construed to require application of the ASTM Standard Practice E2600-15 "Standard Guide for Vapor Encroachment Screening" to achieve compliance with all appropriate inquiries.

The purpose of ASTM Standard Practice E2600-15 is to provide practical guidance and a useful process for conducting a *vapor encroachment screen (VES)* on a property parcel involved in a *real estate transaction* in the United States of America with respect to *chemicals of concern (COC)* that may migrate as vapors onto a property as a result of contaminated soil and groundwater on or near the property.

A vapor encroachment condition (VEC) is the presence or likely presence of chemicals of concern (COCs) vapors in the vadose zone of the Property caused by the release of vapors from contaminated soil and/or groundwater either on or near the Property. A VEC may exist in connection with the Property due to areas of concern (AOCs) from current or historical uses of the Property and/or vicinity properties.

A VEC may exist from migration of COCs through subsurface conduits such as pipelines, utility lines, and sewer and storm-water lines from offsite source of contamination.

In defining a standard of good commercial and customary practice for determining a VEC on a parcel of property, the goal of the process established by this practice is to identify whether or not a VEC exists or is likely to exist on the property. The term VEC means the presence or likely presence of any COC in the indoor air environment of existing or planned structures on a property caused by the release of vapor from contaminated soil and/or groundwater either on the property or within close proximity to the property, at a concentration that presents or may present an unacceptable health risk to occupants. The term is not intended to include *de minimis* conditions that do not normally represent an unacceptable health risk to occupants that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be *de minimis* does not represent a VEC.

Minimum search distances surrounding the Property to identify the Area of Concern (AOC)		
STANDARD ENVIRONMENTAL RECORD SOURCES	**MINIMUM SEARCH DISTANCE (MILES) CHEMICALS OF CONCERN**	**MINIMUM SEARCH DISTANCE (MILES) PETROLEUM HYDROCARBON CHEMICALS OF CONCERN**
Federal NPL	1/3	1/10
Federal CERCLIS	1/3	1/10
Federal RCRA-CORRACTS	1/3	1/10
Federal RCRA-TSDF	1/3	1/10
Federal RCRA-Generator	Property only	Property only
Federal IC/EC Registries	Property only	Property only
Federal ERNS	Property only	Property only

Minimum search distances surrounding the Property to identify the Area of Concern (AOC)		
STANDARD ENVIRONMENTAL RECORD SOURCES	**MINIMUM SEARCH DISTANCE (MILES) CHEMICALS OF CONCERN**	**MINIMUM SEARCH DISTANCE (MILES) PETROLEUM HYDROCARBON CHEMICALS OF CONCERN**
State/Tribal Equivalent NPL	1/3	1/10
State/Tribal Equivalent CERCLIS	1/3	1/10
State/Tribal SWLF	1/3	1/10
State/Tribal Leaking Storage Tank	1/3	1/10
State/Tribal Registered Storage Tank	Property only	Property only
State/Tribal IC/EC Registries	Property only	Property only
State/Tribal Voluntary Cleanup Sites	1/3	1/10
State/Tribal Brownfield Sites	1/3	1/10

The screening involves a two tiered approach to assessing VEC risk as described below.

VES TIER I - Search Distance Test

The search distance test involves a review of the regulatory database report (see Sections 5.2 through 5.4 of this Report) and available historical records to determine if any *known or suspect potentially contaminated* properties exist within the Area of Concern (AOC). Sites of potential Vapor Encroachment Condition (pVEC) are typically former and current gas stations (using petroleum hydrocarbons), dry cleaners (using chlorinated volatile organic compounds), manufactured gas plants (using volatile and semi-volatile organic compounds) and industrial manufacturing facilities using volatile organic compounds from parts-cleaning, degreasing, etc.),

The AOC is defined as any up-gradient sites within the ASTM Standard Practice E1527-21 standard search distances and any cross- or down-gradient sites within 1/3 mile for solvents and petroleum products.

If the contamination at the known or potentially contaminated site within the AOC consists of Contaminants of Concern (COCs), then a potential Vapor Encroachment Condition (pVEC) exists and Tier II screening is recommended. If no known or potentially contaminated sites with COCs exist within the AOC, no further inquiry is deemed necessary.

Releases of COCs may have occurred from the sites in the vicinity of the Property, but if (1) the medium affected is the soil only, (2) the sites within AOC are beyond the critical distance of 100-feet, and (3) the site location and/or plume of contamination is excess of the critical distance of 100-feet from the Property, the sites may not pose a significant threat or an unacceptable health risk via vapor intrusion pathway to the Property.

There was no indication of a significant risk of vapor intrusion at the Property.

VES TIER II - Plume Test

The Plume Test assesses whether or not a plume is close enough to the Property to result in a VEC, based on the following:

1. Critical Distance Determination – Determined by the distance from the Property to edge of a contaminant plume in any direction (vertical, horizontal, lateral).

2. A VEC exists if there is a plume of volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), volatile inorganic compounds (VICs), or free petroleum product that has accumulated above a water table within 100 feet of the Property, or if a plume of dissolved volatile petroleum hydrocarbons is present within 30 feet of the Property.

Sites were mapped to determine the location of the Property and any potential plumes of contamination relative to the Property and the groundwater gradient. In addition, case information for each site was reviewed, if available.

ODIC reviewed historical and current use(s) of the Property as well as the State and Federal databases discussed in Section 5 for onsite and adjacent properties of potential environmental concern for vapor encroachment. Sites may have been identified in the EDR Radius Map Report (see Sections 5.3 and 5.4) within the AOC that may pose a pVEC at the Property based on the Tier I evaluation. However, these properties are not necessarily identified as RECs with respect to the Property.

No sites were identified that pose a significant risk of vapor intrusion to the Property.

6.0 USER PROVIDED INFORMATION

6.1 USER PROVIDED INFORMATION

The United States Environmental Protection Agency (USEPA) All Appropriate Inquiry (AAI) and ASTM Standard Practice E1527-21 Phase I Standards require that the *Report User* conduct independent research and consider certain information before purchasing a property.

The purpose of this section is to describe tasks to be performed by the *User*. The "All Appropriate Inquiries" Final Rule (40 CFR Part 312) requires that these tasks be performed by or on behalf of a party seeking to qualify for an *landowner liability protections (LLP)* to CERCLA liability. While such information is not required to be provided to the *environmental professional*, the *environmental professional* shall request that the *User* provide the results of these tasks as such information can assist the *environmental professional* in identifying Recognized Environmental Conditions.

Per ASTM Standard Practice E1527-21, the "*User*" is defined as follows:

> *User—the party seeking to use Practice E 1527-21 to complete an environmental site assessment of the property. A User may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager.*

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*"), the *User* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The *User* should provide the following information to the *environmental professional*. Failure to conduct these inquiries could result in a determination that "*all appropriate inquiries*" is not complete.

USER/CUSTOMER QUESTIONNAIRE	
QUESTION	**USER/CUSTOMER TO ANSWER**
(1.) Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25). *Did a search of land title records (or judicial records where appropriate identify any environmental liens filed or recorded against the subject property under federal, tribal, state, or local law?*	The *User* has not informed ODIC of any environmental cleanup liens filed or recorded against the Property. An environmental cleanup lien search is not required from ODIC as part of this Phase I ESA.
(2.) Activity and land use limitations (AULs) that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26). *Did a search of land title records (or judicial records where appropriate, identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the subject property and/or have been filed or recorded against the subject property under federal, tribal, state or local law?*	The *User* has not informed ODIC of any activity or land use limitations associated with the Property. An activity or land use limitations search is not required from ODIC as part of this Phase I ESA.

(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). *Do you have any specialized knowledge or experience related to the subject property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the subject property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?*	The *User* has not informed ODIC of any specialized knowledge or experience related to the Property or nearby properties.
(4.) Relationship of the purchase price to the fair market value of the *Property* if it were not contaminated (40 CFR 312.29). *Does the purchase price being paid for this Property reasonably reflect the fair market value of the Property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the Property?*	The *User* has not informed ODIC of any information pertaining to the purchase price with respect to the fair market value of the Property.
(5.) Commonly known or *reasonably ascertainable* information about the *Property* (40 CFR 312.30). *Are you aware of commonly known or reasonably ascertainable information about the Property that would help the Environmental Professional(EP) to identify conditions indicative of releases or threatened releases? For example, as User,* *(a.) Do you know the past uses of the Property?* *(b.) Do you know of specific chemicals that are present or once were present at the Property?* *(c.) Do you know of spills or other chemical releases that have taken place at the Property?* *(d.) Do you know of any environmental cleanups that have taken place at the Property?*	The *User* has not informed ODIC of any commonly known or reasonably ascertainable information about the Property that would identify conditions indicative of releases or threatened releases, other than as described in Section 6.3 (Interviews), if applicable.
(6.) The degree of obviousness of the presence of likely presence of contamination at the *Property*, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). *Based on your knowledge and experience related to the subject property, are there any obvious indicators that point to the presence or likely presence of releases at the subject property?*	The *User* has not informed ODIC of any obvious indicators that point to the presence or likely presence of contamination at the Property, other than as described in Section 6.3 (Interviews), if applicable.

6.2 PRELIMINARY TITLE REPORT OR LAND TITLE RECORDS

No preliminary title reports, recorded land title records, or historical chain of title was reviewed during this ESA. ODIC's scope of investigation as well as the contractual agreement between ODIC and the *Client*

does not include obtaining and/or reviewing preliminary title reports, recorded land title records, or a historical chain of title.

6.3 INTERVIEWS

Interview with Property Occupant	
	INTERVIEW DETAILS
Summary	The Property is not occupied.

Interview with Past Owners, Operators, and Occupants	
	INTERVIEW DETAILS
Reason for No Interview	Past owners, operators, and occupants were not available for interview by ODIC.

Interview with State and/or Local Government Officials
Interview Details
ASTM E1527-21 Section 10.3 states that questions to be asked pursuant to this section may be asked in person, by telephone, or in writing, in the discretion of the *environmental professional*. See Section 5.2 for summary of regulatory agencies contacted for records under the Freedom of Information Act.

7.0 REFERENCES

During the preparation of this *Report*, a number of sources were contacted, individuals were interviewed, and various federal, state, county or local municipal agencies were consulted. Documentation applicable to the Property in those departments and agencies was requested and reviewed when and where reasonably ascertainable, as detailed in ASTM Standard Practice E1527-21. Individuals listed without phone numbers were contacted in person or by e-mail. Reference sources for site-specific information, hydrogeologic setting, technical data, historical research data, environmental reports and other records used are identified throughout this *Report* in corresponding sections. Any additional reference sources not cited in each applicable section of this *Report*, if applicable, are disclosed in this section.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 23), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 11/30/2025 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
T0258 EPA ID:: CAL000293495	5555 PHILADELPHIA ST	SSW 0 - 1/8 (0.102 mi.)	D20	178

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 11/30/2025 has revealed that there is 1

RCRA-VSQG site within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/20/2025 has revealed that there are 6 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal voluntary cleanup sites

VCP: Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

A review of the VCP list, as provided by EDR, and dated 10/20/2025 has revealed that there are 2 VCP

sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 11/30/2025 has revealed that there are 18 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 3 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

DD'S DISCOUNTS #5017 (Continued) **1024844981**

EPA Region:		09
Land Type:		Not reported
Federal Waste Generator Description:		Not a generator, verified
Non-Notifier:		Not reported
Biennial Report Cycle:		Not reported
Accessibility:		Not reported
Active Site Indicator:		Handler Activities
State District Owner:		Not reported
State District:		Not reported
Mailing Address:		5151 SAN FELIPE ST STE 1000
Mailing City,State,Zip:		HOUSTON, TX 77056
Owner Name:	Ross Dress For Less Inc	
Owner Type:		Other
Operator Name:	Kathy Hatch	
Operator Type:		Other
Short-Term Generator Activity:		No
Importer Activity:		No
Mixed Waste Generator:		No
Transporter Activity:		No
Transfer Facility Activity:		No
Recycler Activity with Storage:		No
Small Quantity On-Site Burner Exemption:		No
Smelting Melting and Refining Furnace Exemption:		No
Underground Injection Control:		No
Off-Site Waste Receipt:		No
Universal Waste Indicator:		Yes
Universal Waste Destination Facility:		Yes
Federal Universal Waste:		No
Active Site State-Reg Handler:		---
Federal Facility Indicator:		Not reported
Hazardous Secondary Material Indicator:		N
Sub-Part K Indicator:		Not reported
2018 GPRA Permit Baseline:		Not on the Baseline
2018 GPRA Renewals Baseline:		Not on the Baseline
202 GPRA Corrective Action Baseline:		No
Subject to Corrective Action Universe:		No
Non-TSDFs Where RCRA CA has Been Imposed Universe:		No
Corrective Action Priority Ranking:		No NCAPS ranking
Environmental Control Indicator:		No
Institutional Control Indicator:		No
Human Exposure Controls Indicator:		N/A
Groundwater Controls Indicator:		N/A
Significant Non-Complier Universe:		No
Unaddressed Significant Non-Complier Universe:		No
Addressed Significant Non-Complier Universe:		No
Significant Non-Complier With a Compliance Schedule Universe:		No
Financial Assurance Required:		Not reported
Handler Date of Last Change:		20180906
Recognized Trader-Importer:		No
Recognized Trader-Exporter:		No
Importer of Spent Lead Acid Batteries:		No
Exporter of Spent Lead Acid Batteries:		No
Recycler Activity Without Storage:		No
Manifest Broker:		No
Sub-Part P Indicator:		No

Name: DD'S DISCOUNTS #5017
Address: 5537 PHILADELPHIA ST, STE A
City,State,Zip: CHINO, CA 91710
Site ID: 24196
CERS ID: 10532407
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 24196
Site Name: dd's Discounts #5017
Violation Date: 02-23-2021
Citation: Un-Specified
Violation Description: Hazardous Waste Generator Program - Administration/Documentation - General Local Ordinance
Violation Notes: Returned to compliance on 02/23/2021. OBSERVATION: The CERS submittal dated 2/14/2021 was rejected because it was incomplete. A complete submittal should include the hazardous materials inventory, map and emergency response plan. The inventory from 2020 was also found to be missing an entry for universal waste. CORRECTIVE ACTION: Submit a complete CERS submittal for 2021 and update the inventory to include universal waste.
Violation Division: San Bernardino County Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 24196
Site Name: dd's Discounts #5017
Violation Date: 05-29-2024
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 06/18/2024. OBSERVATION: At the time of the inspection, observed the facility to not have any waste disposal documentation available for review by the inspector. CORRECTIVE ACTION: Maintain all hazardous waste disposal documentation on site for a period of (3) three years from the date the waste was removed. Provide the previous (3) three years of hazardous waste disposal documentation to the inspector for review. If disposal documentation is not available, have the waste on site lawfully removed and forward the documentation to the inspector. Sign and return the Certificate of Compliance to the inspector within 30 days of this inspection indicating hazardous waste disposal documentation has been provided.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Citation: 23 CCR 16 2641(j) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(j)
Violation Description: Failure of the leak detection equipment to be installed, calibrated, operated, and/or maintained properly.
Violation Notes: Returned to compliance on 01/31/2023. OBSERVATION: Owner/Operator did not properly install, calibrate, operate and/or maintain leak detection equipment. Sensor VR 205 in 91 stp sump was unable to detect liquid within the sump. Sensor was replaced with VR 208. UST monitoring plan requires updated liquid sensor. CORRECTIVE ACTION: Submit as-built plans for sensor replacement and update UST monitoring plan submitted to the California Environmental Reporting System (CERS) to reflect new sensor within 91 STP sump.

Violation Date: 01-16-2025
Citation: 23 CCR 16 2641(h) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(h)
Violation Description: Failure to have an approved UST Monitoring Plan.
Violation Notes: OBSERVATION: The UST monitoring plan needs to be updated with the correct pipe monitoring sensors for UST 1 (regular) and UST 2 (premium) and update the mechanical line leak detector for UST 2 (premium). CORRECTIVE ACTION: Update the monitoring plan with the following changes: 1) Under pipe monitoring: UST 1 (regular) and UST 2 (premium) tank top sumps are being monitored by both VR208 and VR205 sensors. UST 1 (regular) fill sump and UST 2 (premium) STP sump are monitored by VR208 sensors. 2) Update the mechanical line leak detector information for UST 2 (premium) from VMI to Red Jacket FX IV. Provide these changes to the monitoring plan within 30 days.

Violations:
Site ID: 104178
Site Name: 7-ELEVEN INC. #43146
Violation Date: 01-11-2017
Citation: HSC 6.7 29291(b) - California Health and Safety Code, Chapter 6.7, Section(s) 29291(b)
Violation Description: Failure of the UST system to be designed and constructed with a monitoring system capable of detecting the entry of the hazardous substance into the secondary containment.
Violation Notes: Returned to compliance on 01/11/2017. OBSERVATION: THE 91 FILL SUMP LIQUID SENSOR (VR 208) FAILED WHEN TESTED. COMPLIANCE MET ON SITE: TECHNICIAN REPLACED SENSOR WITH LIKE, AND RE-TESTED- PASSED
Violation Division: San Bernardino County Fire Department
Violation Program: UST

TEXACO SERVICE STATION (Continued) **S101629874**

Violation Source:	CERS,
Site ID:	104178
Site Name:	7-ELEVEN INC. #43146
Violation Date:	01-14-2019
Citation:	23 CCR 16 2636(f)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(2)
Violation Description:	Failure of the functional line leak detector (LLD) monitoring pressurized piping to meet one or more of the following requirements: Monitored at least hourly with the capability of detecting a release of 3.0 gallons per hour leak at 10 pounds per square inch and restrict or shut off the flow of product through the piping when a leak is detected.
Violation Notes:	Returned to compliance on 01/14/2019. OBSERVATION: Diesel line leak detector failed. Technician replaced like siphon jet for leak detector on-site and retested Passed. No further actions required.
Violation Division:	San Bernardino County Fire Department
Violation Program:	UST
Violation Source:	CERS,
Site ID:	104178
Site Name:	7-ELEVEN INC. #43146
Violation Date:	01-28-2015
Citation:	HSC 6.7 25291 - California Health and Safety Code, Chapter 6.7, Section(s) 25291
Violation Description:	Failure to maintain under-dispenser containment, sumps, and/or other secondary containment in good condition and/or free of debris/liquid.
Violation Notes:	Returned to compliance on 01/28/2015. THE DIESEL FILL SUMP CONTAINED FLUID AT THE TIME OF INSPECTION (AMOUNT WAS BELOW THE FOOT OF THE SENSOR MOUNT). IT APPEARS THAT THERE IS A CRACK IN THE UNDERSIDE OF THE FIBERGLASS TOP HAT, WHICH IS ALLOWING SURFACE WATER TO INFILTRATE THE SUMP. REQUIREMENT: ALL OBSERVED LIQUID WAS PROPERLY REMOVED AND CONTAINERIZED BY THE TECHNICIAN DURING THE INSPECTION. VIOLATION CORRECTED; HOWEVER, THE DIESEL FILL CONTAINMENT SUMP DOES NOT CURRENTLY MEET THE OPERATIONAL REQUIREMENT TO PREVENT LIQUID ACCUMULATION. NOTIFY THIS DEPARTMENT IF REPAIRS WILL BE MADE TO THE SUMP (NOTE: BREAKING OUT MAY REQUIRE A PERMIT DEPENDING ON THE PROPOSED SCOPE OF WORK).

Violation Date:	01-03-2023
Citation:	HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description:	"Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes:	Returned to compliance on 01/03/2023. OBSERVATION: Owner/Operator failed to meet one or more of the following spill container requirements: install or maintain spill container which is liquid-tight, has a minimum capacity of five gallons, has a functional drain valve or other method for the removal of liquid from the spill container, and is resistant to galvanic corrosion; did not perform tightness test at installation, every 12 months thereafter, or within 30 days after a repair; did not have tested using manufacturer's guidelines, industry codes, engineering standards, or method approved by PE, or was not tested by a certified UST service technician; or failed to maintain testing records for 36 months. Spill container in 91 fill sump failed when tested hydrostatically. Spill container was replaced and retested in the presence of inspector. CORRECTIVE ACTION: Install or repair spill buckets to meet all of the listed requirements, have tightness tested using approved method, by certified UST service [Truncated]

TEXACO SERVICE STATION (Continued) **S101629874**

Violation Description:	Failure of the functional line leak detector (LLD) monitoring pressurized piping to meet one or more of the following requirements: Monitored at least hourly with the capability of detecting a release of 3.0 gallons per hour leak at 10 pounds per square inch and restrict or shut off the flow of product through the piping when a leak is detected.
Violation Notes:	Returned to compliance on 01/13/2023. OBSERVATION: Line leak detector failed to meet one or more of the following requirements: Monitor at least hourly; Capable of detecting a release of 3.0 gallons per hour at 10 p.s.i.g.; Restricting or shutting off the flow of product through the piping when a leak is detected. Diesel pressurized line leak detector was not not functional when tested. CORRECTIVE ACTION: Repair or replace line leak detector so that is it is capable of monitoring at least hourly, detecting a release of 3.0 gallons per hour at 10 p.s.i.g., and shutting off the flow of product through the piping when a leak is detected.

RWQCB Region:	SANTA ANA RWQCB (REGION 8)
Site History:	Case initiated following removal of 3 single walled stainless steel USTs in 1994. Elevated concentrations of petroleum hydrocarbons in the gasoline range and fuel oxygenates detected. A total of 550 cubic yards of impacted soil was removed offsite. Vertical and lateral assessment of impacted area completed. SVE treatment has reached asymptotic levels. Case is being considered for closure. Remedial Action Completion Certification issued Feb 25, 2011.

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/26/2025
Date Data Arrived at EDR: 01/05/2026
Date Made Active in Reports: 01/22/2026

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

6385301-ESAI
1608 & 1624 PHILADELPHIA ST
ONTARIO, CA 91761

TARGET PROPERTY COORDINATES

Latitude (North):	34.034229 - 34° 2' 3.22''
Longitude (West):	117.681097 - 117° 40' 51.95''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	437125.4
UTM Y (Meters):	3765965.8
Elevation:	835 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	50005381 ONTARIO, CA
Version Date:	2021

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

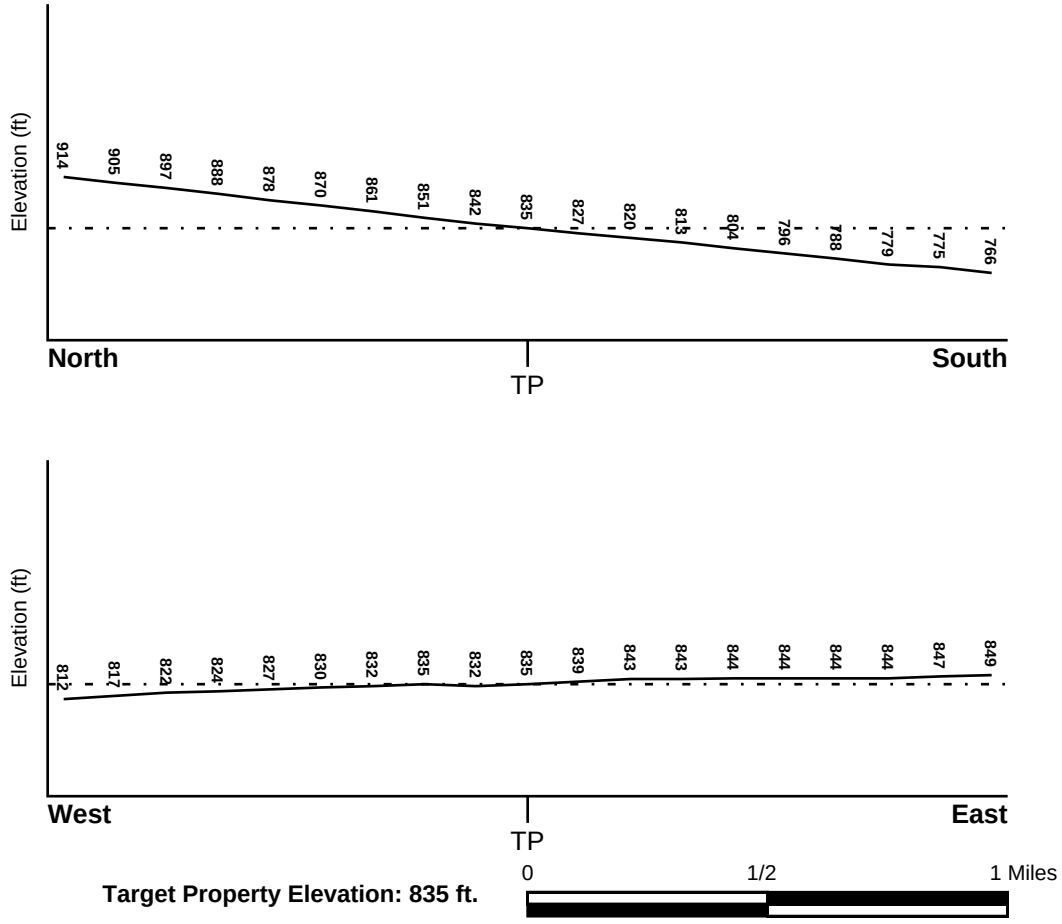

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1750F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
Not Reported	

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
ONTARIO	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: TUJUNGA

Soil Surface Texture: gravelly loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	18 inches	gravelly loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1
2	18 inches	59 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1

Soil Map ID: 2

Soil Component Name: GRANGEVILLE

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 6.6
2	11 inches	59 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 6.6

Soil Map ID: 3

Soil Component Name: HANFORD

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

Orphan Well Prioritization Listing
California Department of Conservation
Telephone: 916-445-9686
Includes locations of wells included in the California State Well Plugging and Sealing Project, managed by CalGEM (California Geologic Energy Management Division).

Geothermal Wells Listing
Department of Conservation
Telephone: 916-445-9686
Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservations Geologic Energy Management Division (CalGEM, formerly DOGGR).

PHYSICAL SETTING SOURCE RECORDS SEARCHED

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by ODIC Environmental were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR Inquiry # 8288205.4	Contact: FRANK TRINIDAD

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by ODIC Environmental were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

EXECUTIVE SUMMARY

DESCRIPTION

The LightBox City Directory Report is designed to assist environmental professionals in evaluating potential liabilities on select properties resulting from past activities. The report includes a search of available business directory data at approximately five-year intervals.

SOURCES

Through agreements with major city directory publishers, including Cole Information, InfoUSA, and Bresser, as well as our own collections (Haines & Stewart), the LightBox City Directory Report offers comprehensive national coverage.
LightBox is authorized to reproduce and redistribute all works featured in this report. The purchaser of this LightBox City Directory Report may include it in their final report(s).

This report includes a search of the following sources:

LICENSED CONTRACTOR'S DECLARATION

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code and my license is in full force and effect.

Contractor Joe Allen Jr. Date 5-23-91

OWNER-BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason: (Sec. 7031.5 Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish or repair any structure, prior to its issuance also requires the applicant for the permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).)

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale. (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds improvements thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for the projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

I am exempt under Sec. _____ B.&P.C. for this reason _____

Date _____ Owner _____

WORKER'S COMPENSATION DECLARATION

I hereby affirm that I have a certificate of consent to self-insure or a certificate of Workers' Compensation insurance or a certified copy thereof (Sec. 3700 of the Labor Code).

Policy No. Fidelity Fair mont Insurance Co
Expiration Date: 1/26/92
CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

This section need not be completed if the permit is for one hundred dollars ($100) valuation or less, or if the work is to be performed by an owner of property who is not otherwise engaged in the building trade, unless such owner obtains such insurance for the purpose of this permit. I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation laws of California.

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

I affirm that I have complied with the requirements of Section 3700 of the Labor Code, by securing coverage for workers' compensation and will maintain that coverage until the work governed by this permit is completed.

Insurer's Name _____
Insurer's Address _____

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation laws of California, and agree that if I should become subject to the Workers' Compensation provisions of the Labor Code, I will forthwith comply with those provisions. This permit shall be void if the person signing this permit is not the contractor.

Signature of Applicant Joe Allen Jr. Date _____
Mailing Address _____
City State Zip _____

OK to issue as per PC

VALIDATION

When properly validated on the space, this form constitutes a permit to do the work described herein. The permit will expire if work is not started within 180 days, or if work is abandoned for more than 180 days.

LICENSED CONTRACTOR'S DECLARATION

I hereby affirm that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code and my license is in full force and effect.

Jim Williams 5-28-91
SIGNATURE DATE

OWNER - BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5 Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does not build or improve for others, except that such owner-builder will not be exempt if he builds or improves for sale or lease).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law).

☐ I am exempt under Sec. _____ B.&P.C. for this reason _____

Date _____ Owner _____

WORKER'S COMPENSATION DECLARATION

I hereby affirm that I have a certificate of consent to self insure or a certificate of Workers' Compensation insurance or a certified copy thereof (Sec. 3700 Labor Code).

Policy No. 6135561 Company Pharmacist Insurance Co

☐ I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

CONSTRUCTION LENDING AGENCY

I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097 Civil Code).

Lender's Name _____
Lender's Address _____

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above mentioned property for inspection purposes.

PR4-032426-01

Dear Requestor:

On March 24, 2026, the Department of Toxic Substances Control (DTSC) received your email. Requesting records under the Public Records Act. After a thorough review of our files, no site records were found pertaining to the sites/facilities referenced below.

6 Hughes, Irvines, 92618: (Yes, for Both UWED & HWTS) (Bold & underline are yes). 155, 161, 169, 183, 191 & **195 S Juniper St.**, & 250, 258 & 260 E 2nd Ave., Escondido, **13930 Magnolia Ave., Chino**, **8046 & 8052 Main St., Stanton & 300 Thor PL., Brea** & 4064, **4080** & 4088 **Misson Inn Ave., Riverside: (Yes, HWTS).** 5962 Priestly Dr., Carlsbad., & 871 Rancheros Dr., San Marcos & 12183 10th St., Yucaipa & 1608 & 1624 Philadelphia St., Ontario, & 15 Corporate Park, Irvine .

DTSC Generator information: DTSC Cypress Office does not house Generator/**HWTS** Records.

DTSC's Hazardous Waste Tracking System (**HWTS**) may have records that pertain to this request. This unit tracks toxic waste generators, transporters (manifests), and disposal facilities. If you are interested in this type of information, it can be identified by accessing the HWTS database at http://hwts.dtsc.ca.gov. If you are interested in retrieving detailed reports, additional charges may apply. Please contact the HWTS unit by email at HWtsadmn@dtsc.ca.gov or by phone at (800) 618-6942 for further information. For copies of manifests, please send an email to mcr@dtsc.ca.gov.

UWED: ***(Universal Waste Electronic Devices/E-Waste):***

DTSC's E-Waste unit may have records that pertain to this request. "E-Waste" refers to any unwanted electronic device or Cathode Ray Tube (CRT) and is classified as universal waste. E-Waste frequently contains hazardous materials, predominantly lead and mercury, and is produced by households, businesses, governments, and industries. I have forwarded your Public Records Act request to that unit for further processing. Please contact them by email at electronicwaste@dtsc.ca.gov if you are interested in this information.

A large number of our records are available on EnviroStor, an online database that provides non-confidential, public access to DTSCs data management system. It tracks our cleanup, permitting, enforcement, and investigation efforts at hazardous waste facilities and sites with known or suspected contamination issues. EnviroStor is available 24/7, 365 days a year. The data reflects the latest updates as they are entered in the system. Access it from your computer or smartphone, the local library – anywhere Internet access is available. Just go to www.envirostor.dtsc.ca.gov. You will find a step-by-step tour of EnviroStor under the "How to Use EnviroStor" menu on the website.

If you have any questions or would like further information regarding your request, please contact me, email at jone.barrio@dtsc.ca.gov .

Sincerely,

Jone Barrio

This is to confirm that the OFM Hazardous Materials Section (HMS) has searched its records for any file(s) pertaining to the subject property, as described in your request, and finds that no records exist for the above site description(s).

Records maintained by OFM-HMS date back to mid-1980's. Records searched include:

- Facilities with hazardous waste generator permits, hazardous materials handler permits, underground storage tank permits, universal waste permits, tiered permits, EPCRA facilities, RMP facilities, Cal ARP facilities, and/or waste recycling generators, including inactive and/or out of business records, as well as non-permitted facility actions
- Logs of permits issued for the removal, installation, and/or modification of underground storage tanks
- Records and databases pertaining to illicit dumping, spill reports, release notifications, and complaints
- Incidents responded to by the hazardous materials emergency response team
- Sites undergoing remediation for contaminated soil and/or groundwater

- Environmental Risk Evaluation
- Liability Risk Management and Risk Reduction
- Mold/Water Intrusion Management Consulting Services

SUMMARY OF EXPERIENCE

Possessing over 28 years of industry experience, Mr. Miller has prepared and reviewed thousands of Transaction Screen Assessments, Phase I Environmental Site Assessments, and Phase II Subsurface Investigation Assessments. With an extensive background in environmental risk assessment, chemistry, biology, physics, and statistical analysis, Mr. Miller has, in the past, provided diverse environmental consulting and risk assessment services to American International Group (AIG), one of the ten largest companies in the U.S. Other relevant experience includes evaluating environmental liability, general liability, product liability, and fleet liability loss exposures. He also oversaw account portfolios comprised of a broad spectrum of manufacturing facilities, HUDMAP, land developers, pharmaceutical firms, property management firms, and contractors. In his current role as a Senior Environmental Professional, Mr. Miller conducts and reviews environmental site assessment reports, conducts QA/QC, generates recommendations regarding liability risk management and risk reduction, provides mold/water intrusion management consulting services, and develops and implements presentations and training programs.

Neil Kuemerle

Environmental Consultant

Education

University of California Irvine

2006 Environmental Management Certificate Program

California State University, Fullerton

2003 Bachelor of Arts, Business Administration

Experience

Odic Environmental | Los Angeles, California
Environmental Consultant ***2007*** – **Present**

Primary Responsibilities, Odic Environmental:

Completion of Phase I Environmental Site Assessments consisting of the following:

- Performance of an on-site visit to view present conditions (chemical spill residue, die-back of vegetation, etc.) ; hazardous substances or petroleum products usage (presence of above ground or underground storage tanks, storage of acids, etc.); and evaluate any likely environmentally hazardous site history.
- Evaluation of risks of neighboring properties upon the subject property
- Review of Federal, State, Local and Tribal Records out to distances specified by the ASTM 1528 and AAI Standards
- Interview of persons knowledgeable regarding the property history
- Examination of municipal or county planning files to check prior land usage and permits granted
- File searches with public agencies (State water board, fire department, county health department, etc.) having oversight relative to water quality and soil contamination issues.
- Examination of historic aerial photography of the vicinity.
- Examination of current USGS maps to scrutinize drainage patterns and topography.
- Examination of chain-of-title for Environmental Liens and/or Activity and Land Use Limitations (AULs).

Additional Experience

- Sampling and analysis of laboratory analytical data for asbestos containing building materials
- Sampling and analysis of laboratory analytical data for lead-based paint
- Sampling and analysis of laboratory analytical data for lead in drinking water

Accomplishments:

Completion of the site reconnaissance and/or report writing of over 1,000 Phase I Environmental Site Assessments applicable to industrial facilities, gasoline service stations and commercial properties between 2007 and the present
